OUR MISSION

Versatile technology solutions to take your organization to the next level.

VersaNext builds **AI automation and custom business apps** that your team uses every day to run the business. Think of it as a **virtual employee**: it schedules jobs, keeps customer records up to date, captures receipts, takes notes by voice, routes approvals, and reports on how things are going, so your people spend less time on busywork and more time serving customers and growing.

We don't sell websites. We build the tools you operate your business with, connected to the email, texting, QuickBooks and Google Drive you already use.

Built Around You

No off-the-shelf software. Your apps fit your workflows, your team and the way you already work.

Works While You Work

AI handles the repetitive steps: entering data, reading receipts, sending reminders and keeping records current.

A Real Partner

A dedicated Account Manager who knows your business, plus 24/7 support to keep everything running.

Who it's for

Businesses that run on phone calls, paperwork, spreadsheets and memory, and want a simpler, faster way to manage jobs, customers, crews and money.

Your virtual employee, on the job every day

Every VersaNext solution combines everyday business apps with AI that does the busywork. Pick what your business needs:

Scheduling & Jobs
Book work, assign crews, and see what's happening today, this week and next.

Customers & Follow-Up
One place for contacts, history and next steps, with reminders so nothing slips.

Voice Entry
Talk instead of type. Your team speaks an update and the AI fills in the right records.

Receipts, Photos & Documents
Snap a picture and the details are read, sorted and saved for you.

Approvals
Send requests to the right person and get a yes or no from their phone.

Reporting
Clear, up-to-date views of jobs, hours, spending and sales, without building spreadsheets.

Connected to the Tools You Already Use
Email, texting, QuickBooks and Google Drive, so information flows automatically instead of being typed twice.

Common questions

Is this a website?
No. We build apps and automation your team uses to run daily operations. If you also need a simple web presence, we can add one as a small extra.

Couldn't we set this up ourselves?
You could try, but you'd be building, securing, backing up and maintaining it yourself. With VersaNext you get a working solution, a dedicated partner, and 24/7 support, so your team stays focused on the business.

How does my team use it?
On their phones, tablets or computers. It's built around how they already work, so there's little to learn.

What happens as we grow?
Your Account Manager adds features and automation as your needs change.

Our Process

Your virtual employee, built around your business.

From first demo to long-term support, here is how we put AI automation and custom apps to work running your operations.

1

See It First DEMO

We show you a working version of your apps and automation handling real tasks from your day, so you can see it at work before you commit.

2

Choose Your Package AGREE

Together we agree on the package that best fits your business and goals.

3

Custom Build & Onboard MONTH 1

One month building the apps and automation your team will use daily, designed around your business, your workflows, and your team, with our support team by your side. **No off-the-shelf software. Built for you.**

4

Refine & Perfect INCLUDED

Your first month of edits and changes is included, so it works the way your team works.

5

24/7 Support & Hosting 24/7 MONTHLY

Your virtual employee stays on the job alongside your team, with around-the-clock 24/7 support plus hosting, all for a monthly fee.

Changes beyond the first month are billed hourly, unless you choose our higher-tier plan with ongoing support and changes included.

6

Your Sales Rep & Account Manager YOUR CONTACT

The same trusted person from your first meeting on. They know your business, take your requests and pass them to our developers, who build what you need.

Your VersaNext Team

The people behind your virtual employee.

Sales Rep & Account Manager

YOUR MAIN CONTACT FROM THE FIRST MEETING ON

- Learns what your business needs and shows you a live demo
- Helps you choose the right package
- Stays your main point of contact for the life of your account
- Your liaison to our development team: takes your requests and checks in regularly

Developer

BUILDS AND MAINTAINS YOUR APP

- Builds your app around the way your business works
- Works behind the scenes on the changes your account manager sends over
- Keeps your app running smoothly, backed by 24/7 support
