VERSANEXT

SEE IT WORK BEFORE YOU COMMIT

Proof of Concept Program

A short, low-risk pilot where we build a working version of your virtual employee around one real workflow in your business, so you can see the results for yourself.

- Built on your real process
- Working app in about 1–2 weeks
- Cost credited toward your build

VersaNext · AI Automation Agency
A division of Tech Sourced Solutions

Prepared by Austin Stinson

WHY A PROOF OF CONCEPT

Don't take our word for it. Watch it run your workflow.

Most business owners have been sold software that looked great in a demo and never fit how they actually work. A VersaNext Proof of Concept (POC) flips that: we build a real, working tool around one of your real processes, your team uses it, and you decide based on results.

WHAT YOU GET OUT OF IT

1

Lower risk

A small, defined commitment instead of a full build. You see exactly what you're buying before you buy it.

2

Proof on your own work

Not a generic demo. Your jobs, your customers, your steps, built the way your team already talks and works.

3

Fast results

A working app on your phone in about 1–2 weeks, so you're judging real use, not a slide deck.

4

Your team buys in early

The people who'll use it every day help shape it from day one, so adoption is easy when you go live.

THE PROGRAM AT A GLANCE

1
workflow in scope: the one that costs you the most time

1–2
weeks to a working prototype

~2
weeks of hands-on use by your team

100%
of the POC fee **credited** toward your full build

ALREADY PROVEN IN THE FIELD

We've built custom tools for local businesses like yours. Each one started with a single painful workflow:

Fielder Tree & Miller Tree
Field-service desk apps for scheduling crews and tracking jobs

Southern Concrete Coatings
A field desk that keeps jobs and crews organized

Sparkle Tallahassee
One app for employees and managers

TSS Hour Tracker
Simple time clock for hours and payroll

VNXT CRM
Voice-first sales tool: talk after a call and it logs the call, updates the deal and sets your follow-up

HOW THE POC WORKS

Seven steps from idea to decision.

1. **Discovery call** — DAY 1
   A 30–45 minute conversation about your business, your team, and where time and money slip through the cracks.
2. **Pick one painful workflow** — DAY 1–3
   Together we choose the single process that would make the biggest difference: scheduling, job tracking, time clock, sales follow-up, paperwork. We agree on scope and success goals in writing.
3. **We build your prototype** — WEEK 1–2
   We build a working app around your real process, with your names, steps and branding. You share sample info and answer quick questions; we handle the rest.
4. **Live walkthrough with your team** — END WK 2
   We show it to you and your team on a live call or in person, get everyone set up on their phones, and make quick tweaks on the spot.
5. **Trial use** — WK 3–4
   Your team uses it on real work. We check in, fix anything that gets in the way, and track the results we agreed on.
6. **Results review** — END WK 4
   We sit down with a one-page summary: time saved, what improved, what your team said, and what a full build would add.
7. **Your decision** — DECISION
   Move to a full build with the POC fee credited, or walk away with no further obligation. Either way, you'll know.

You provide

- One decision-maker
- 1–3 team members to test
- Sample info (jobs, forms, lists)
- ~2 hours total of your time

We deliver

- A working app on your phones
- Live team walkthrough
- Support during the trial
- One-page results summary
- Full-build plan

Scope limits

- One workflow, one team
- Core features only
- Light connections to your tools
- Bigger asks go into the full-build plan

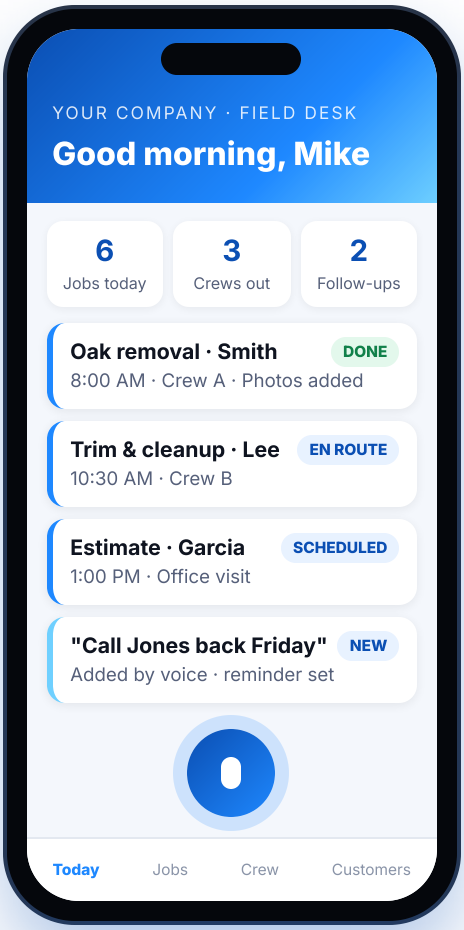

Agreed upfront

Success criteria are set before we build, e.g. "office time on scheduling cut in half," "every job logged same day," "no missed follow-ups." At the review we measure against them, so the decision is simple.

YOUR EXPERIENCE

Your own app, on your phone.

No installs, no training manual. You get a link, tap it, and your virtual employee is ready, branded with your business name and built around the way you already work.

EXAMPLE SCREEN

WHAT YOU'LL SEE

Your day at a glance

Today's jobs, who's where, and what needs attention, all on one screen for owners, managers and crews.

Just talk to it

Tap the mic and say what happened. It logs the note, updates the job and sets the reminder for you.

Built for your team

Simple screens for crews in the field, more detail for the office. Everyone sees what they need.

Looks like your business

Your name, your colors, your job types and the words your team already uses.

WHAT YOU TAKE AWAY

POC Results Summary

EXAMPLE

Office hours on scheduling / week	before → after
Jobs logged same day	your improvement
Missed follow-ups	before → after
Team feedback	team comments

- A working app your team has already used
- A one-page results summary like the one shown
- A clear full-build plan: what we'd add next and timing
- Your POC fee credited toward your build

PRICING THE POC

A small commitment that counts toward your build.

There are three ways to set up a POC. We recommend a small paid POC that's fully credited toward your full build. It keeps both sides serious, and it costs you nothing extra if you move forward.

OPTION A

Free POC

$0

- No upfront fee
- A low-friction way to try one workflow
- Offered in select cases
- Scope and success goals still agreed in writing

Best for: selected accounts, by arrangement.

RECOMMENDED

OPTION B

Paid POC, fully credited a small POC fee

- Small, fixed fee paid upfront
- **100% credited** toward your deposit / build when you sign
- Keeps both sides focused and committed
- You and your team stay engaged throughout

Best for: most clients. This is the usual path.

OPTION C

Refundable deposit your deposit

- Refunded if agreed goals aren't met
- Becomes your build deposit if you sign
- A strong confidence signal
- Needs clear, measurable goals upfront

Best for: if you've been disappointed by software before.

HOW THE CREDIT WORKS

STEP 1
Pay the POC fee

→

STEP 2
See it work on your process

→

STEP 3
Sign & the fee is credited toward your build

GOOD TO KNOW

- Fixed price and fixed scope, no surprise charges
- Everything built in the POC carries into the full build
- Credit applies when you sign within a set window of the review
- Full builds follow our standard packages: deposit, build fee and monthly care plan
- Exact pricing confirmed in your proposal
- We'll confirm your POC investment before work starts

FROM POC TO FULL BUILD

The results review: where the decision happens.

REVIEW MEETING AGENDA · 45 MIN

5 min	Recap the goals we agreed on
10 min	Results vs. goals (one-page summary)
10 min	Team feedback: what they loved, what to change
10 min	Full-build plan: next features and timeline
10 min	Package, credit applied, and start date

WHAT SIGNALS IT'S TIME TO GO

- Agreed success goals were met
- The team is already relying on it
- Owner asks "Can it also do...?"
- Clear savings in time or missed work
- Credit deadline is coming up

ONE-PAGE POC AGREEMENT · CHECKLIST

- ☐ **Client & decision-maker:** _____
- ☐ **Workflow in scope:** _____
- ☐ **Out of scope** (goes in full-build plan)
- ☐ **Success goals** (2–3, measurable)
- ☐ **Testers** (1–3 team members named)
- ☐ **Sample info** client will provide
- ☐ **Timeline:** build start, walkthrough, review date
- ☐ **POC fee:** a small POC fee, paid upfront
- ☐ **Credit:** 100% toward build if signed within a set window
- ☐ **Ownership:** prototype continues into full build
- ☐ **Privacy:** client info kept secure & confidential
- ☐ **No obligation** to continue after the review

CLIENT SIGNATURE / DATE

VERSANEXT REPRESENTATIVE / DATE

REVIEW DATE

AFTER YOU SIGN

1

Full build

We grow your POC into the complete tool, adding the features from your full-build plan.

2

Refine together

Your team uses it day to day while we fine-tune screens, steps and reports.

3

Ongoing care

Monthly support, hosting and improvements, with one Account Manager who knows your business.

Ready to see it work on your business?

Let's pick your workflow and reserve your POC slot.
